the rater's or examiner's beliefs.

~~Definition of projective measure in Psychology.~~

Projective tests are methods of personality assessment in which some degree of ambiguity in the test stimuli or instructions creates opportunities for subjects to structure their responses in terms of their individual personality characteristics, and thereby provide information about the nature of these characteristics.

Although projective methods are accordingly more ambiguous and less structured than so-called objective methods, the differences between these methods are relative rather ...

## ~~Overview of Personality Assessment - OER2Go~~

Ans. • Projective tests of  
personality are widely used by  
psychologists. • Projective  
techniques are most indirect  
method to assess personality.  
• Psycho analytic theory proposed  
that behaviour is also determined  
by unconscious forces. • The  
projective techniques were  
developed to assess unconscious  
motives and feelings.
