Overview The Cisco 1800 series integrated services routers includes the Cisco 1841 router, which is a data-only router. Cisco 1841 routers support WAN interface cards (WIC), voice/WAN interface cards (VWICs) in data mode only, single-wide high-speed WAN interface cards (HWICs), and advanced integration module (AIMs).

CISCO 1800 SERIES QUICK START MANUAL Pdf Download | ManualsLib

Configuring a Simple Firewall. The Cisco 1800 integrated services routers support network traffic filtering by means of access lists. The router also supports packet inspection and dynamic temporary access lists by means of Context-Based Access Control (CBAC). Basic traffic filtering is limited to configured access list implementations that examine packets at the network layer or, at most, the transport layer, permitting or denying the passage of each packet through the firewall.
