Computer Arithmetic: Algorithms and Hardware Designs is an outgrowth of lecture notes the author used for the graduate course "ECE 252B: Computer Arithmetic" at the University of California, Santa Barbara, and, in rudimentary forms, at several other institutions prior to 1988. The text has benefited greatly from keen observations, curiosity, and encouragement of my many students in these courses.

Behrooz Parhami's Textook on Computer Arithmetic (2e)

The first part is on generic algorithms and hardware architectures for the basic arithmetic operations: addition, subtraction, multiplication, and division. The second part is on the arithmetic of prime fields. And the third part is on the arithmetic of binary fields.
