The Human Condition is a work by Hannah Arendt published in 1958. Hannah Arendt studies the vita activa for itself, regardless of the vita contemplativa: this leads to re-establish the hierarchy among the various activities of the vita activa, and more specifically to reaffirm the priority of the action on the work. This statement of the role of the action aims to give men the desire to leave a trace in the world beyond their own death, to satisfy their quest for immortality.
