Advanced BASH Exercises. by J. David Giese on January 01, 2016 BASH is the most widely-used and widely-supported shell for Linux. There are other shells that are better than BASH in various ways, but we feel that none of these other shells are better enough to warrant replacing BASH as the de-facto standard when writing user shell scripts. NetBSD and Debian use a stripped-down shell as the ...

Beginner. 25 Exercises: grep, man, mkdir, echo, awk, sed, wc commands, files, folders, backup script, frequency calculation. Unpack gz file, find directories created, create subfolders, sort directory contents, list only files with an “a”, warnings, remove all lines of file that include a tag, change column format, etc.

LINUX Exercises, Exams, Challenges

Yes, I do realise that. You can trust me But I'm not interested in simply searching the internet for common solutions to common problems. I want a collection of interesting problems chosen for their pedagogical value. I want to use them to learn shell scripting, not just copy and paste some useful scripts. As you stated, that would defeat the whole purpose of the operation.

100 interesting shell scripting problems

The exercises that follow test and extend your knowledge of scripting. Think of them as a challenge, as an entertaining way to take you further along the stony path toward UNIX wizardry. On a dingy side street in a run-down section of Hoboken, New Jersey, there sits a nondescript squat two-story brick building with an inscription

Exercises - Linux Documentation Project

Solution 1.8 Possible solutions are: • Here we need to invert the le rst in order for headto select the last 10 lines (which are now the rst 10). Then another inversion using tacgives back the original order, i.e. `1 < resources/testfile tac | head | tac` • The trick is to use `tail -n +2`, i.e. `1 tail +n2 resources/matrices/3.mtx` • We can use the `-v`
