Sulzer RND90 Main Engine | Sulzer - RR Marine Tech  
Sulzer RTA72U Marine Diesel Engine The diesel engine is a type of internal combustion engine which ignites the fuel by injecting it into hot, high-pressure air in a combustion chamber. In common with all internal combustion engines the diesel engine operates with a fixed sequence of events, which may be achieved either in four strokes or two, a stroke being the travel of the piston between its extreme points.

The famous marine engines which were widely used as a ship propulsion plant are as follows: SULZER. RD series. It is the oldest engine series from SULZER and very rarely seen in shipping industry today. It is equipped with rotary exhaust valves and fuel valve with short spindle. The cylinder liner quilts were of wet type and placed only at the upper part. It has pulse turbo charging system with no auxiliary blower

R Series Engine (R = Research) From within Sulzer the opinion was that the 'R' engine was only built to prove that it was possible to design and build an LDA28 without all the problems associated with the earlier engines. The LDA28-R was listed as a six cylinder rated at 1,700bhp at 850rpm and an eight cylinder in line rated at 2,300bhp at 850rpm.
