Triage Guidelines In Obstetrical Use Several obstetric triage acuity tools have been developed based on this model. These tools typically classify patients based on the urgency of the patient's condition, often using a five-level system, and can increase the proportion of high-acuity patients seen in an urgent fashion . Number 667 • July 2016

*Triage Guidelines In Obstetrical Use*

Obstetric Triage. Obstetric triage volume typically exceeds the overall birth volume of a hospital by 20–50% 1. In a study of one large center, up to one third of evaluated women did not give birth at that time and were sent home or to another unit at the completion of their evaluation and management 2. Pregnant women most commonly present for evaluation for labor at term.

### *Triage Guidelines In Obstetrical Use - ciclesvieira.com.br*

Triage is the preliminary clinical assessment process that sorts patients before full diagnosis and treatment and has become crucial in times of overcrowded emergency units and resource constraints. 1 To deliver timely, efficient and safe high-quality care, it is important to select patients according to the severity of their condition. 2 Numerous triage instruments have been developed in several countries, such as in Australia [Australasian Triage Scale (ATS)], the United Kingdom ...

### *Validation of an emergency triage scale for obstetrics and ...*

An example of a contemporary obstetric triage program at an academic medical center is presented. Result: A successful contemporary obstetric triage paradigm is one that addresses the questions of "sick or not sick" and "labor or no labor," for every obstetric patient that presents for care. Failure to do so risks poor patient outcome, poor patient satisfaction, adverse litigation outcome, regulatory scrutiny, and exclusion from federal payment programs.

### *Contemporary Obstetric Triage - PubMed*

Obstetric triage is a common practice site for certified nurse-midwives (CNMs) and certified midwives (CMs), which presents special liability risks. CNMs/CMs can manage risks more effectively if...
